

Orient Leader Strip

how to replace the leader strip on an Orient banner stand

what you'll need

- drill
- drill bit
- rivet gun
- rivet
- orient unit
- masking tape

1

drill through the rivet until you're able to remove the pole bucket

2

drill the hole through the pole bucket

7

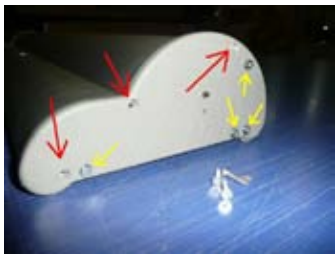

add some masking tape to secure the roller and leader together

8

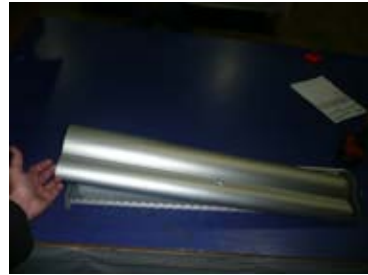

slide one corner of the leader through the bottom of the roller and bring it up

3

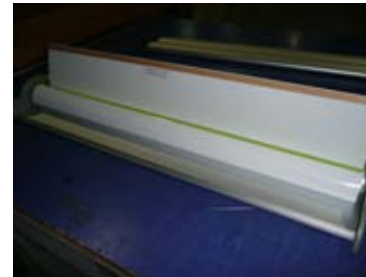

remove the 3 screws where the red arrows are pointing and loosen up the screws where the yellow arrows are pointing and do the same for other side

4

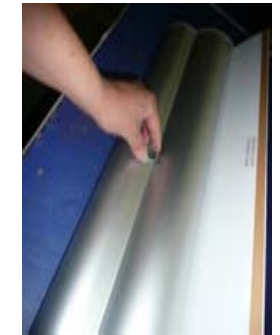

remove the top from base of unit

9

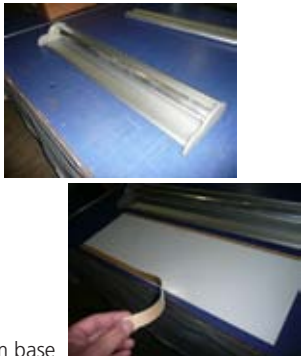

leader mounted on the roller

10

after adding the top on, drill all screws in and place pole bucket back on

5

bottom base
remove the strip from the leader

6

level the leader making sure it's even and just mount it to the roller

7

insert rivet into the hole

8
